FOR IMMEDIATE RELEASE

PVA Announces the Release of the New VPX-2KS Dual Component Spray Valve

Cohoes, NY – July, 2016 – Global manufacturer and supplier of conformal coating and precision dispensing systems, PVA (Precision Valve & Automation, Inc.) is pleased to announce the release of the new VPX-2KS Dual Component Spray Valve.

The VPX-2KS is a progressive cavity metering valve, capable of accurately spraying 2K chemistries. A servo controlled rotor that seals a rubberized stator produces a continuous flow of material for each component. The tight tolerance on the sealing mechanism assures pulse-free and drip-free operation of the valve, even with low viscosity fluids. Frank Hart, PVA Sales and Marketing Manager states, “The VPX-2KS Dual Component Spray Valve is just another example of how PVA continues to meet the growing needs of our customers. We are seeing increased demand in two-component coatings both from end users and in development from formulators. This valve introduces the cleanest, most flexible atomized process for 2K coatings while also providing unparalleled volumetric accuracy.”

The VPX-2KS requires no routine flushing or purging as each component is metered in a separate chamber. The A and B components are introduced via a disposable static mixer in the air cap to produce a fine conical shaped pattern. The valve features a +/-2% accuracy, dependent on material with a viscosity range of 1 – 100,000 cps. More information can be found by visiting our website, www.pva.net.

About PVA

PVA is a global supplier of conformal coating systems and innovative fluid dispensing solutions that remain at the forefront of motion and application technology. PVA's customer driven solutions are utilized worldwide in industries ranging from solar, semiconductor packaging, printed circuit board assembly, medical device manufacturing, and consumer electronics. Throughout the changing global manufacturing landscape, PVA remains committed to providing our customers with exceptional products and industry-leading global support.
